

Final evaluation data analysis

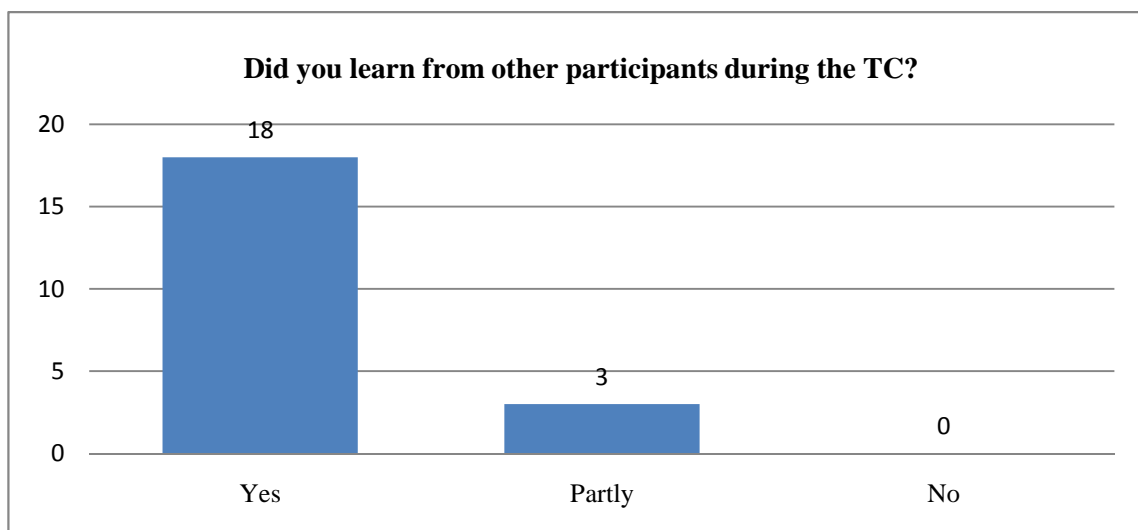

1. Was the Training Course (TC) held in an environment where you felt comfortable to learn?

Comments:

- It was unbelievable to find such nice and wonderful place in the middle of the market. I enjoy staying and learning here.
- The environment was very nice and comfortable.
- The place was centrally located and very charming. I have never been in such place before. It was a little bit noisy at night outside.
- I really liked the place, it was calm.
- It was quite and non-disturbing.
- Very nice touch to have it in a catholic church.
- It's great environment, warmth and sun all the day.
- Relaxing place.

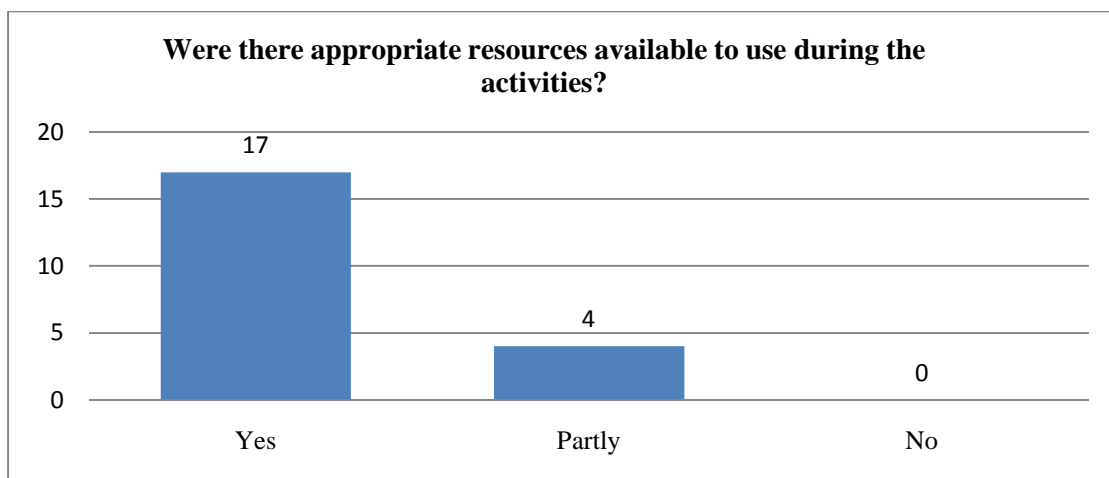

2. Did you learn from other participants during the TC?

Comments:

- Other participants were more older than me and had more knowledge than I do, really enjoy the conversation with them.
- A lot of perspective and perspective were shared.
- Other culture and idea.
- I have learned a lot about different cultures and economical, political and social problems in other European countries.
- Very useful, from culture side, also from blogging.
- To talk about issues with each other was so much more interesting than only receive information from the teacher.
- Yes, I did and not only on topics commented with the TC, but also I gained much cultural knowledge.
- For sure. Some of the participants were outstanding, thinking strong, so I learned a lot of new thinks' during conversations.
- The most important part of every training course that interaction with other participants, sharing stories, experiences.
- I think a lot of people are having great and powerful ideas which inspired me. I also learned more about group work.
- I have really about the reality in different countries- the problems of the youth NGO's, their challenges.

3. Were there appropriate resources available to use during the activities?

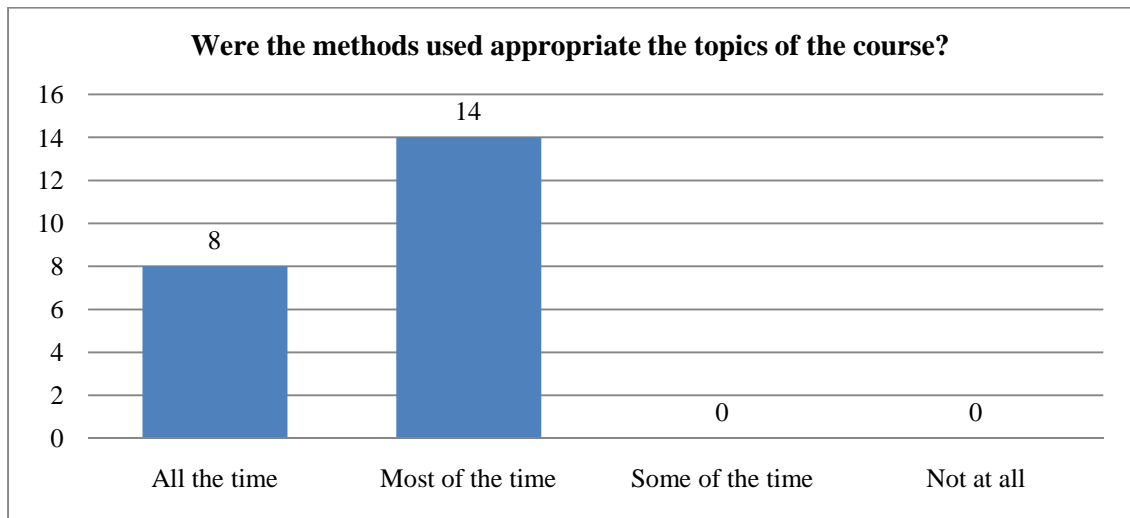

Responses also reveal that most of the participants were satisfied with the duration and location within the project.

4. What do you think about the work of the TEAM of the TC? Did you receive appropriate support from them the TEAM during this TC?

In one of the question respondents was asked to evaluated the TEAM of TC and express the opinion about TEAM support during the TC. Respondents characterized the TEAM as professional, relaxed and easy going as well as very helpful and well prepared. As said one of the respondents “ Everything was great. The TC wouldn't be so effective if there wouldn't so be so positive and energetic people”. Respondents highlight that TEAM have been active and energetic, because they tried to involve all participants in every activities as well as they have been really supportive and giving participants freedom, maybe some time too much. Was mentioned that the TEAM was useful during the TC, because they sharing ideas and show example how to have to work together.

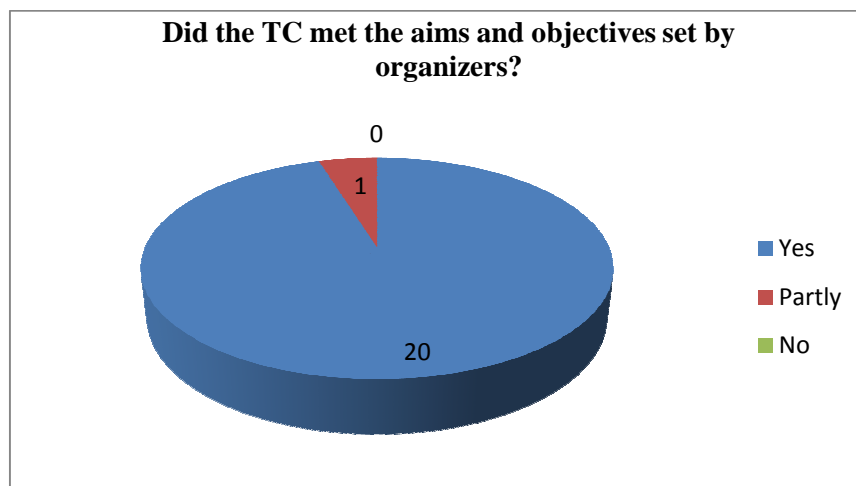

5. Were the methods used appropriate the topics of the course?

Comments:

- Energizers are very good. Methods are fine and appropriate the course.
- I liked the way we first focused on general and then on the specific (blogs).
- I would focus on more precise issues, examples.
- It was great to learn things through alternative methods.

6. Did the TC met the aims and objectives set by organizers?

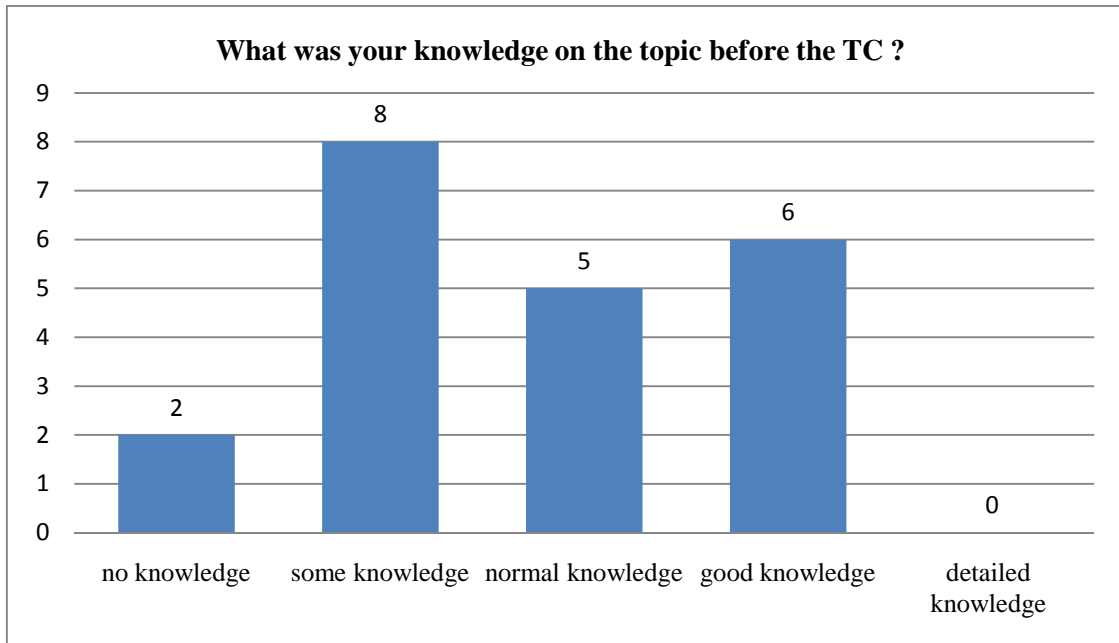

Comments:

- Everything was well organized and we followed the previously set of goals.
- I have impression that some of the workshops we could done better, and participation of people wasn't that extraordinary.
- All the lectures were according to the programme. They were informative and clear for understanding.

7. What was your knowledge on the topic before the TC? (1- no knowledge; 5- detailed knowledge)

Evaluated from 1-5 (1-no knowledge, 2-some knowledge, 3- normal knowledge, 4- good knowledge, 5- detailed knowledge)

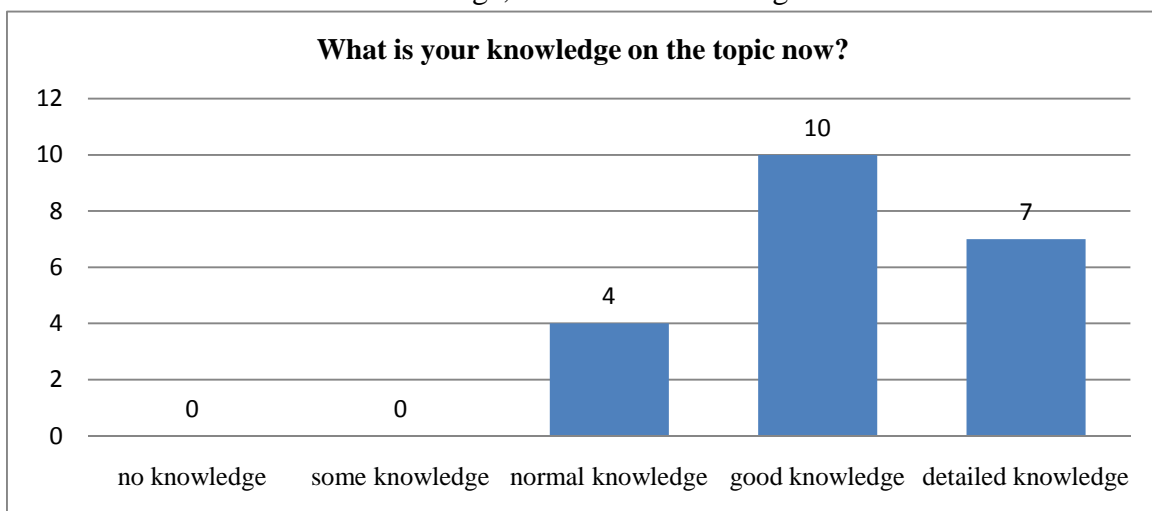

Comments:

- It was an average knowledge based on experience gained during the life.
- It's quite close to my field of study.
- I only had my own knowledge and my one experiences before.
- I knew already thing about blogging, but the technical part was a discovery for me.

8. What is your knowledge on the topic now? (1- no knowledge; 5- detailed knowledge)

Evaluated from 1-5 (1-no knowledge, 2-some knowledge, 3- normal knowledge, 4- good knowledge, 5- detailed knowledge)

Comments:

- Now I think that my knowledge of the topics is much better.
- I believe I can learn even more.
- I have managed to analyze for myself in a very interesting way and amount of the topic.
- I learned a lot from other participants and from Anna. I think it was really important topic.
- In some topics my knowledge is more detailed, but will have go through this material once again to improve it.
- I learned a lot of more about advocacy, so I'm satisfied. I still think that I need to research a lot more about the
- Can't to say it's was detailed, but it's very close to it.
- It really was 4, and as Einstein said 'The more you learn, the more you understand that you don't know anything'.

9. In which way the new information will be useful for you?

Participants gave quite wide way description where they will try to use the information. Some of the examples as ‘New information will be useful in life, school education, NGO education and work’ and ‘For my blog and for my future youth work, where I could share my experience’ as well as ‘I think I could share my new knowledge in my country trough different culture games and informal learning concept’.

The way summary, where new information could be useful:

- Education system
- During similar activities/courses
- In the creation and development process of blogs
- For participants jobs
- To deliver training and workshops in NGO

10. Please list the methods and work models that you will take home after this TC?

According to respondent answer, they most valuable and useful methods would be energizers (were mentioned 85% of answers), group work and discussion, as well as team building activities and blog advocacy and workshops. Some respondents were mentioned that they will take home also role play and non-formal education methods as well as dividing into groups with different assignments and round discussion tables.

Most mentioned methods:

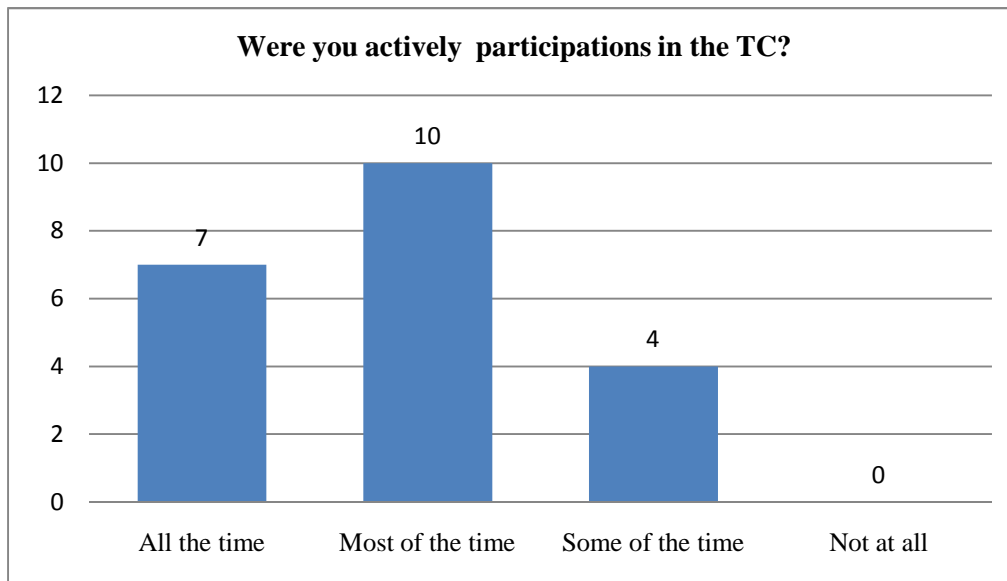

1. Energizers
2. Group work
3. Discussions, round table
4. Team building

11. Which personal attitudes you had reflected upon mostly during this TC?

By participants opinion responsibility, decision making, tolerance and human rights context was reflected upon mostly during the TC. Also participants realized that team work is more useful and it's possible to work effectively also with almost stranger. Some respondents highlight that also theme about human rights discrimination of minorities and integration was reflected in current TC.

For example ‘I have reflected upon my place in the teamwork, the way I cooperate with the others’ or ‘Human rights- especially freedom of expression- should people who are discriminating towards others have it or not?’

12. Were you actively participations in the TC?

Comments:

- I would like to be more participating, but somehow I wasn't very aware about issues discussed during conversations. But I try not to miss the points, because the debates were really good.
- Most of the time, I think I was most active during the process of blogs because they were about issues that I'm interesting in.
- Most of the time, I'm usually the observer type.
- I have problems with my English, so I didn't understand all.
- Participation always depends on the topics which you are discussing so sometimes i showed my experience.

13. Did you find any partners for new projects? What kind of projects would you like to develop after coming back home?

Respondents mainly gave positive answer to the question about any partners for new projects. Mainly they want to continue friendship and contacts what they create in TC and in this case, have to highlight some current projects what were mentioned. For example, participant would like to develop projects about non-formal education methods and to develop a project with 'media education center'. As well as they would like to develop the projects, which are based on social problems in the European community and projects about democracy. Some want develop and expanding idea about projects of making blog and human rights. Some of them are quite sure, that they find future partners, but have to think about project idea and development context. One part of participants are not sure, that they found partners, but according to answers they knowledge what they get is good ground for the future projects and participants definitely know more aware of other organizations and know where have to go if they want to develop projects. Basically, have to say, that quite a lot of participant create contacts with potential future partners and mainly they now some focus of a projects, what need develop and implement.

14. Imagine this course will be delivered again and you' re part of the team. Explain what part of the program you would do differently and how you suggest to do it?

Respondents appreciated team work and highlighted that project was well organized and done, in the same time, they give some common suggestion.

Some of the suggestions:

- More time for the debates and discussion.
- More round tables where participants could discuss, share and argue about actual issues.
- Have to give more attention to team building activities, not more like 2 persons from each country in one group.
- Need to make better time planning, too much freedom.
- Require that everybody express their opinion.
- Agreements have to be more structured, precisely and not to flexible.
- More socializing activities.

Another comments:

- Thank you so much for everything. I will never together this.
- It was good, it was the 'click' that changed my point of view about education.
- Thank you for your smiley faces and beautiful hearts and work. Thanks' for everything it was perfect.
- We should also definitely have the evening of culture. Another thing is the past when you have to explaining all about blogs through videos. It was really helpful.

Conclusion:

To better understand the achieved results of workshop, we asked participants to evaluate workshop by answering to “open” and “closed” questions. In “closed” questions they had to rank offered answers in scale from 5-1, where 1 stands for “no knowledge” and 5 is “detailed knowledge” and questions with more answering options like “yes”, “partly” and “no” and another variant, where participants had 4 options (all the time, most of the time, some of the time and not at all). Have to highlight that was giving space for comments after every closed question, so it was an opportunity to express or admit some meaningful points.
